

AHEHP 2023

Summer School in Applied Health Econometrics and Health Policy

July, 24th – 29th 2023 (Extended format: until August, 4th)

Bergamo, Italy

What

Health data analysis and health econometrics play an important role in the design of actions to live longer and age better

CHALLENGES

- ✓ Growing health care expenditure
- ✓ Ageing population
- ✓ Impact of chronic diseases
- ✓ Fast technological change
- ✓ New pandemics

AHEHP focuses on the analysis of health care markets, health behaviors and policy interventions, through the support of applied econometric methods

Why

We bring together students, health care professionals, leading researchers in health economics and public health from Italian and foreign universities for

- fast and effective learning
- unique social environment with invaluable interaction among participants

About the 2022 edition:

- Participants from 10 different countries, 17 institutions and 13 degree programs
- 13 teachers from 12 different universities
- 11 STATA laboratories with data applications

Collaborations:

Centre for Economic and Political Research on Ageing, Università della Svizzera italiana Centre for Health Economics, University of York UK's National Innovation Centre for Ageing, Newcastle

How

- ✓ One week of full time lectures, STATA laboratories and group/individual work
- ✓ Half-day crash course of Introduction to applied econometrics using STATA the week before starting (4 hours).
- ✓ Applied econometric exercises assigned on daily basis and performed with STATA after classes (2 hours of group/individual work per day).
- ✓ A supervised group project to develop during the second week (following courses) and discussed in the final exam (only for attendants taking 6 ECTS).
- ✓ A certificate of attendance is provided, conditional upon lectures and lab attendance, and completion of daily handworks. Acknowledgement of 6 ECTS upon discussion of final project.
